

SMALL FARMS

Hotel Kabuki is dedicated to supporting America's small family farmers over industrial agriculture corporations.

We believe that food grown by families who are passionate about their products simply taste better. These men and women rise at sunrise and put in long days tilling the soil, just so we can enjoy the best that Mother Earth can provide.

This takes farm-to-table to the next level: It's about the right farms, organic non-GMO plants, natural seeding and grazing techniques, hormone-free livestock, and eggs laid in sync with the sunrise instead of artificial light.

We ask you to join us in our mission to buy right, eat right, and support those who strive to make life better.
